

# Infobric Equipment and Assets Quality Policy

*We offer services to vehicle owners as well as machine and tool owners, simplifying their daily lives and contributing to sustainable community development through their use. Through technological solutions, we aim to create a simpler and more efficient way of working, so good that they cannot imagine being without them.*

Infobric Equipment and Assets, in its own operations and in our services and products, is committed to working towards the United Nations' Global Sustainable Goals No. 8 (Decent Work and Economic Growth) and No. 16 (Peaceful and Inclusive Societies).

Infobric Equipment and Assets shall meet customer expectations by consistently delivering the most attractive and efficient products that meet their needs. Our services are characterized by simplicity, high user-friendliness, and continuous improvement.

Employees at Infobric Equipment and Assets should be responsive and maintain ongoing communication with the customer, to be perceived as a competent and efficient collaborative partner where each delivery serves as a reference for future business. We shall meet the expectations of our stakeholders in our efforts to improve our processes.
